

## MIL-55310/08-Series Specifications

### 0.887L x 0.540W x 0.200H (in)

PDI *MIL-PRF-55310/08* Oscillators are available in both standard and custom frequencies to provide precision timing in a hermetically sealed package for military and avionics applications.

| Dash  | Frequency         | Supply                | Input                 | Output Voltage                   |                 | Rise/Fall Duty | Operating Temperature |           |           |       |       |           |     |     |

| Aging Per Year (Max) (Measurements shall be taken @+70°C ±0.2°C at intervals of not more than every 72 hours for 30 days minimum) |                   |                       |                       |                                  | 5 Hz – 4        | .9 MHz         | 5 MHz –               | 50 MHz    |           |       |       |           |     |     |
| Per 30 Days   |                   |                       |                       | ±1 p                             | pm              | ±2 p           | pm                    |           |           |       |       |           |     |     |
| Per 90 Days   |                   |                       |                       | ±2 ppm                           |                 | ±4 ppm         |                       |           |           |       |       |           |     |     |
| Per Year  |                   |                       |                       | ±5 p                             | ±5 ppm ±10 ppm  |                | ppm                   |           |           |       |       |           |     |     |

| Environmental Specifications  |  |  |  |  |
|---|--|--|--|--|
| Terminal Strength   | MIL-STD-202 , Method 211 , Condition A   |  |  |  |
| Terminal Strength   | Applied Force: 2 pounds each terminal for 10 seconds , Bends: 5 at 45 degrees each |  |  |  |
| Vibration sinusaidal  | IAW MIL-PRF-55310 and MIL-STD-202, Method 204                                      |  |  |  |
| Vibration, sinusoidal   | Non-operating: Test Condition D, Operating: Not Required                           |  |  |  |
| Ambient Pressure Non-operating: IAW MIL-PRF-55310 , Operating: MIL-STD-202 , Method 105 , Condition C |  |  |  |  |

The product described in this spec. consist of this specification and MIL-PRF-55310. Decimal XXX =  $\pm$  .005, XX =  $\pm$  .020 Metric [XXX =  $\pm$  .13], [XX =  $\pm$  .50]
